

Application Developer/Fullstack (f/m/d)

Digitalization | Permanent employment | Munich

We are looking for you to augment our team.

Bio-Hybrid GmbH is a German tech startup that rethinks and sustainably shapes the future of mobility. For less smog, more smartness and more quality of life. With a team of some 30 members at its Nuremberg and Munich locations, the company is preparing for the production launch of the canopied Bio-Hybrid pedelec scheduled for mid-2021. In its DUO, Cargo BOX and Cargo PICK-UP versions, the new mobility concept closes the gap between bicycles and cars. Originally founded by Schaeffler, the company now operates under the umbrella of the Meisterwerk Group following a management buyout.

We offer

- An opportunity to design the future of mobility
- A state-of-the-art work environment in dynamic surroundings
- A role with high responsibility and ample room to maneuver
- A trust-based leadership culture and cutting-edge working conditions

Your key responsibilities

- Developing applications and tools for the maintenance and service of the Bio-Hybrid
- Creating interfaces and tools to connect the production process to the cloud backend
- Active participation in the agile development process
- Technical coordination with suppliers and development partners

Your profile

- Degree in computer science, information technology, electrical engineering, etc. or several years of relevant professional experience
- Several years of experience in application development (e.g. C++, Python)
- Solid knowledge in designing user interfaces
- Working proficiency with CI/CD (e.g. Azure DevOps) tools
- Experience in one or more of the following fields would be advantageous:
 - Embedded Linux systems and/or ECUs
 - Cross platform applications
 - CAN Bus Interface
 - Programming and using REST APIs
 - Designing user interfaces with Qt and QtQuick
 - Establishing update processes (firmware, applications)
 - Creating maintenance and service applications
 - Project management
- Independent, efficient, target- and solution-oriented working style, paired with a high level of personal responsibility and goal orientation
- Team-focused, communicative personality
- Good written and verbal English language skills, German would be a plus

We look forward to your application!
